④	Information Screen	Displays file name and recording type Displays GPS information
⑤	Google Map	Displays current position of the vehicle (Internet connection required)

Our favorite things about the Dual

Dual-lens coverage! Record two angles (inside and outside) from the single front unit. Locking memory card cover! Prevents anyone but you from accessing your recordings. Direct-wire harness; no way this dashcam can be "unplugged" without significant effort. And it's easy to install! Built-in GPS receiver; no additional cables or antennas to run. Includes an 8gb memory card so there's nothing else to buy. Fairly compact design, and stays out of the way at the top of the windshield!

Included in the Box:

- 1 Dual Dash Cam with attached wire harness
- 1 Wire harness extension (2.5m / 8.2' total length)
- 1 Infrared LED "night vision" illuminator
- 1 Clear mount with 3M™ adhesive pad
- 1 Spare 3M™ adhesive pad
- 1 Key for memory card cover
- 4 Adhesive cable management clips
- 1 Detailed User Guide
